Dear Mr. Suckoski:

This letter is to serve as a notification to the State of Utah, Department of Natural Resources, Division of Oil, Gas, and Mining, that Minatome Corporation plans to conduct a limited program of drifting at its Mossback property located in San Juan County.

Work planned includes the completion of 100 feet of drifting. This work should produce about 500 tons of barren waste work. The drift will, in future years, be extended to the ore body which was delineated in 1978-80 and will serve as the access for eventual production and extraction at a possible rate of 10,000 tons of ore per year.

The area in which the operation will be conducted is an area of past drilling and mining. Past mining work was carried out in the 1950's.

Other than maintaining the work area in a clean and debris free condition, no reclamation work is planned for 1986.

If you have any questions or comments please let me know.

Sincerely yours,

Albert R. McNeill
Exploration Manager
